

REACH Compliance Statement

The European Regulation (EC) No. 1907/2006 concerning the Registration, Evaluation, Authorization and Restriction of Chemicals (REACH) entered into force on June 1st 2007.

The candidate list of Substances of Very High Concern (SVHC) is frequently updated.

The latest 197 substances subject to analysis per the REACH Regulation were last updated on **January 15, 2019**.

In accordance with article 33, we inform you that brass housings and contact materials include

- Lead (CAS Number: 7439-92-1)

to more than 0.1% w/w. Lead is bound as an alloy component and thus no exposure is expected.

In the manufacturing process of our elastomers, silicone-base polymers are used, which have different concentrations of

- Octamethylcyclotetrasiloxane (D4) [CAS Number: 556-67-2]
- Decamethylcyclopentasiloxane (D5) [CAS Number: 541-02-6]
- Dodecamethylcyclohexasiloxane (D6) [CAS Number: 540-97-6]

The concentration is > 0.1% w/w. It is to be expected that in our later annealing process the siloxanes are significantly discriminated.

For any further questions, please do not hesitate to contact us.
